

## **NEWS FROM FHRA PLANNING AND ENVIRONMENT GROUP**

**February 2010**

### **Planning**

'The Magpie' – Shanlys have been given permission for their second planning application for this site subject to planning obligations. The obligations can be viewed in the planning section of WDC's website.

### **Environment**

You will have noticed three of the cherry trees purchased by the Residents Association to commemorate our recent Cherry Fayres have been planted on the corner of Juniper Lane and Straight Bit. We are grateful to Chepping Wycombe Parish Council for their help in locating these trees which we hope over time will help the village to look even more attractive for residents and visitors alike.

A considerable amount of further work has taken place on this corner, Parish Council staff have spread tons of topsoil to even the surface somewhat and work is in hand to plant a traditional Chiltern hedge and junipers. I understand the cost of transforming this area from a village eyesore to a very pleasant and attractive area has been exceptionally modest due to local Parish Councillors donating their time to help supervise the use of folk from the Community Payback Scheme in this work, and also to Councillor Julia Langley's contribution for the hedge from her ward budget.
